Re: SCP-Carlstadt Site

Dear Sabrina:

Enclosed you will find three copies of the proposed work plan Amendment for the Feasibility Study at the SCP-Carlstadt Site.

Dames & Moore has submitted this proposed change of schedule to amend their original work plan dated October 1, 1985. This proposal is in response to EPA's request that Dames & Moore begin in on-site Feasibility study immediately, instead of waiting until the Remedial Investigation Report is finalized.

EPA will review this schedule and I request that you provide me with any comments the Department has within one week.

Sincerely,

Janet Feldstein, Environmental Engineer
Site Compliance Branch
